

**Powerful**

**Maximum drive door weight 250kg (K20 Series)**

Permanent magnet synchronous motor and high-grade magnets enables a greater torque.

**Ultra silent**

**Less than 50 dB**

The use of a permanent magnet synchronous motor enables the maximum speed of the motor to be 300 rpm, and the operation is ultra quiet.

**Smart**

**Adaptive door weight**

The system automatically detects the door weight and adapts the corresponding torque to keep the door running at a stable speed.

**Long life**

**More than 500,000 cycle test**

Permanent magnet synchronous motor, high-precision bearings, alloy gears, high-precision gear hobbing technology, enable longer service life of the equipment.

**Small size**

**480\*70\*70mm (K20 concealed)**

The motor maintains a maximum speed of 300 rpm without complex deceleration design and is smaller.

**Anti pinch**

**Return function in case of obstruction**

When the door is running and bumps into people or other obstacles, the operator quickly determines that it is blocked and runs in reverse direction to ensure safety.

**APP**

**App debugging**

Mobile app debugging eliminates complex debugging and makes product installation and debugging more convenient.
